

# PRICELIST GREAT BRITAIN

## Introduction

The e-tron Charging Service rates are governed by the maximum charging speed, for which a fast charging speed usually also implies higher costs. Reduced charging rates from preferred partners, such as IONITY, may be regarded as exceptions.

The e-tron Charging Service differentiates the following charging speeds:

- AC charging capacity of the charging station up to a max. of 22 kW  
(AC – alternating current)
- DC charging capacity of the charging station up to a max. of 150 kW capacity  
(DC – direct current)
- HPC charging capacity of the charging station up to a max. of 150 kW capacity  
(HPC – high-power charging)

Charging stations, which are provided for free by a charging infrastructure operator, are basically also made available to e-tron Charging Service customers free of charge. You can conveniently filter for free charging stations on our map. Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event. You can find additional information about the relevant applicable transaction units in this price list.

With regard to the individual charging session, a variable tariff applies. The prices valid for an individual charging session at the respective charging station can be found in the current price list. Changes may occur. Please familiarise yourself with the applicable rates before commencing the charging session. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.

# Audi e-tron Charging Service

## Tariffs Great Britain from 01.03.2021

	<b>City</b> For all those who rather cover short distances and still want to remain flexible: With our City fare, you can charge cheaply when you need to. Particularly suitable for city commuters and plug-in hybrid drivers.	<b>Transit</b> Do you charge frequently on the road and prefer to do so quickly? Then our Transit tariff is just right for you - including discounted IONITY high power charging. Our recommendation for long-distance and electric car drivers.
Basis price per month	4.91 GBP/month	16.81 GBP/month
Minimum contract period <sup>1</sup>	indefinite	12 months

The rates that apply to an individual charging event at the respective charging station in the current price list are subject to change. Please familiarise yourself with the applicable rates before commencing the charging session. The rates detailed below are currently in force.

Variable service fees for	<b>City</b>	<b>Transit</b>
AC charging (<= 22kW)	0.29 GBP/kWh Source London (7.4 kW): 0.08 GBP/min Source London (22 kW): 0.14 GBP/min	0.29 GBP/kWh Source London (7.4 kW): 0.08 GBP/min Source London (22 kW): 0.14 GBP/min
DC charging (<= 150kW) <sup>3</sup>	0.39 GBP/kWh	0.39 GBP/kWh
IONITY HPC (<= 150kW)	0,70 GBP/kWh	0,28 GBP/kWh

Additional Fees	<b>City</b>	<b>Transit</b>
Replacement Card	6,84 GBP	6,84 GBP

<sup>1</sup> The transit tariff contract has a fixed term of 12 months and may be terminated by both parties with a notice period of two weeks to the end of the respective contract period. If the contract is not terminated on time, the contract period is extended by a further 12 month period. The city tariff contract has an indefinite term and can be terminated by either party by giving one month's notice starting from the end of the current month.

<sup>3</sup> Also includes the HPC offering for additional HPC providers in the market launch phase

## Charging abroad

When charging abroad, the applicable charging rate is the tariff that corresponds to your selected tariff model. For the City tariff, the relevant charging rates abroad are those from the local City tariff offering. For the Transit tariff, the relevant charging rates abroad are those from the local Transit tariff offering. The applicable local charging rates can be found in the country overview on the following pages.

The rates that apply to an individual charging event at the respective charging station in the current price list are subject to change. Please familiarise yourself with the applicable rates before commencing the charging session. The rates detailed below are currently in force.

	Land	Tariffa	AC charging (<= 22kW)	DC charging (<= 150kW)	IONITY HPC (<= 150kW) <sup>3</sup>

<b>HU</b>	Hungary	City	131.15 HUF/kWh	133.61 HUF/min	280.00 HUF/kWh

<sup>2</sup> If a charge point operator charges a time-based fair use fee, we consider this fee in our tariffs after three hours in order to keep our tariffs attractive overall. You can see in your vehicle and the myAudi app whether the charge point operator in question charges such a fee. The fair use fee is charged so that the charge point is vacated for other users following the regular charging time. The following charge point operators do not charge a fair use fee: Allego, AUDI Aktiengesellschaft, chargecloud GmbH, Dortmunder Energie- und Wasserversorgung, eins energie in sachsen GmbH & Co. KG, Energie Calw GmbH, Energiedienste der Landeshauptstadt Stuttgart GmbH, EVH GmbH, Fastned, HEOS Object GmbH & Co. KG, Innogy, Mainova AG, MVV Energie AG, Stadtwerke Göttingen AG, Stadtwerke Kiel, Stadtwerke Solingen GmbH, Stadtwerke Tübingen GmbH, Stadtwerke Winsen (Luhe) GmbH, Stromnetz Hamburg GmbH, Virta, WEMAG AG. For all other charge point operators, a fair use fee is applied after the third hour.

## Charging event transaction

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected.

You can also recharge for free using the e-tron Charging Service at free charging stations.

Valid from 15.01.2021, all rates incl. VAT, subject to changes and errors.  
Digital Charging Solutions GmbH - Brunnenstraße 19-21 - D-10119 Berlin
